EDUCATION

University of Houston Expected Dec 2027

Bachelor of Science in Mathematics, Option in Finance | GPA: 3.25/4.00 | Dean's List: Fall 2023 – Spring 2025

Relevant Coursework: Business Statistics, Credit Analysis, Financial Mathematics, Data Analytics, Inferential Statistic

TECHNICAL SKILLS

Data & Programming: SQL Server (CTEs, JOINs, Aggregate Functions, GROUP BY), Python, Git, Github, R

BI & Visualization: Power BI (DAX, Star Schema Data Modeling, Field Parameters, Drill-Down Reports), Tableau

Excel: Power Query, PivotTables/PivotCharts, Reconciliation, Variance Reports

Analytics: KPI Reporting, RFM Segmentation, YoY & Variance Analysis, Credit Analysis, Data Cleaning, Financial Reporting

Virtual Experience: Deloitte Data Analytics Job Simulation (Forage, 2025)

ANALYTICS PROJECTS

Holiday Sales Performance Analysis Oct 2025 – Dec 2025

SQL Server

- Queried 40K+ transactions across 4 holiday seasons using CTEs, multi-table JOINs, and aggregate functions to analyze $7M in revenue and a 76.9% profit margin across 3 sales channels and 10 markets.
- Performed channel and market performance analysis, finding in-store sales drove 63–67% of revenue and market revenue grew 12.4% YoY.
- Applied GROUP BY segmentation by customer age group, product category, and hour of day, identifying ages 1–11 (38.9% of revenue), Toys (15.8%), and a 3 PM demand peak to drive staffing and inventory-planning recommendations.

Retail Revenue Analysis Dashboard Sep 2025 – Oct 2025

Power BI, DAX

- Designed a Power BI star schema (fact and dimension tables) over 58.4K sales records, 18.5K customers, 353 products, 29 stores, and 16 promotions.
- Developed DAX time-intelligence measures (YTD, prior period, YoY growth) and field parameters to track 4 KPIs against targets.
- Delivered interactive drill-down reporting showing revenue of VND 5.9B ($230K USD) at 92% of target and down 15% YoY, supporting store, product, and manager performance reviews.

Customer Segmentation Dashboard (RFM Analysis) Jul 2025 – Aug 2025

Power BI, DAX

- Built a Power BI data model from 50K+ sales records and 18.5K customer profiles across 353 products, 29 stores, and 16 promotions.
- Engineered RFM scoring (1–4 scale) from purchase recency, order frequency, and monetary spend, segmenting customers into 8 actionable segments.
- Developed interactive segment drill-downs with 5 demographic filters to identify high-value and churn-risk customers for targeted retention campaigns.

PROFESSIONAL EXPERIENCE

Hoang Khanh Company Viet Nam - Remote

Accountant Assistant Aug 2023 – Aug 2024

- Cleaned and organized 8 financial reports per month, including revenue, cost, and profit reports for 2 solar power plants, reducing reporting errors and making the workflow 30% faster.
- Consolidated multiple data sources into a master Excel workbook to perform monthly reconciliations and variance analysis of revenue, cost, and profit.
- Identified a seasonal trend through statistical analysis: power plant revenue declined 25% in cold-weather months (Oct–Dec), giving management insight for performance evaluation.
- Reconciled payroll for 20+ employees, ensuring salary payment accuracy on VND 172M ($6.6K USD) in total payments.
